Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Lectures on Building Construction Yet the design was such that the forces had always to be counterbalanced in a very indirect and costly way. Only the religious enthusiasm of the Middle Ages and a fine artistic sense, combined with the modern engineer's skill, without his sense of economy, could have produced such a type of building. The modern architect seems often to have inherited the artistic sense of his medieval predecessor-but not always his skill as a structural designer. With buildings of the simpler and cheaper type, the engineer has not often much to do; yet. they present many interesting points in construction, though not requiring any great amount of mathematics in their design. On the subject of frame buildings, little can be added to Part II of Kidder's Building Construction and Superintendence. Some points brought out by him, however, may well be emphasized. In the matter of the frame, the method shown in Figure 19, page 50, could hardly be improved; considering cost and efficiency together, it is probably the best that can be done. The importance of having at all points the same amount of timber capable of shrinking in a vertical direction can not be overestimated. The lengthwise shrinkage of timber, while by no means inappreciable, is not enough to cause cracks in plaster or to spoil the fit of doors and windows. But its crosswise shrinkage is a very different matter. If one end of a partition is supported on 6 inches more of shrinkable timber than the other, cracks will surely appear in time, and the fit of doors will be noticeably impaired. Where inequalities in the amount...
